

Dear Hiring Manager,

I am excited to apply for the Web & Digital Designer position at CableLabs. As a recent graduate with a Bachelor of Arts in Web Design and Development and hands-on experience designing and developing responsive websites, I am eager to contribute my web design, content management, and digital marketing skills to an organization known for innovation and technology leadership.

Through my academic projects and personal portfolio work, I have developed experience creating responsive, user-friendly websites using HTML, CSS, JavaScript, WordPress, and Bootstrap. I have designed and maintained web content, implemented responsive layouts, and collaborated on projects that required attention to usability, accessibility, and visual consistency. My experience using GitHub for version control and project collaboration has strengthened my ability to work effectively within team environments while managing multiple priorities.

One project I am particularly proud of involved collaborating with a team to design and develop a website for an outfitter company. I contributed custom CSS styling, responsive layouts, image carousels, branding elements, and logo design while working alongside team members using GitHub for project management and version control. This experience reinforced the importance of creating engaging digital experiences that balance visual appeal with functionality.

In addition to my web development skills, I am proficient in Adobe Creative Suite, including Photoshop, Illustrator, InDesign, and Premiere Pro, as well as Figma and Canva. My education and project experience have provided me with a strong foundation in UI/UX principles, responsive design, accessibility best practices, and content-focused web development. I am especially excited about the opportunity to support CableLabs' digital presence through web design, content management, and marketing asset creation while helping improve user engagement and accessibility.

I am drawn to CableLabs' commitment to innovation and collaboration, and I would welcome the opportunity to contribute my creativity, technical skills, and enthusiasm for digital design to your team. Thank you for your time and consideration. I look forward to the opportunity to discuss how my background and skills can support CableLabs' goals.

Sincerely,

Cristal Castle-McCall
